SUMMARY

final year Computer Science student (CGPA: 9.2) at CVR College of Engineering with hands-on experience in full-stack development using Java, Spring Boot, and React.js. Built 2 production-grade projects involving REST APIs, JWT authentication, and real-time data sync. Solved 370+ LeetCode problems with strong foundations in Data Structures, Algorithms, and OOP. Familiar with cloud-integrated workflows and scalable backend design. Seeking the Software Engineering Intern role at LiveRamp to contribute to high-impact data collaboration infrastructure.

EDUCATION

CVR College of Engineering

Bachelor of Technology, Computer Science and Engineering – CGPA: 9.2/10

Hyderabad, India

Aug 2023 – Apr 2027

TSRJC – Telangana State Residential Junior College

TSBIE MPC – Percentage: 98%

Hyderabad, India

Jun 2021 – Mar 2023

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, TypeScript, SQL, NoSQL, Go, R

Frameworks & Libraries: Spring Boot, React.js, Node.js, Express.js, Next.js, Angular, Flutter

Databases: MySQL, MongoDB, Supabase (PostgreSQL)

Tools & Platforms: Git, GitHub, Linux, VS Code, IntelliJ IDEA, Android Studio

Cloud & Others: REST APIs, JWT, CORS, IoT Integration, OpenAI API

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, OS, Computer Networks

PROJECTS

Smart Digital Payment System | React.js, Java, Spring Boot, MySQL, IoT

Apr 2026

- Reduced manual savings tracking time by **70%** for 50+ test users by automating micro-savings workflows via Spring Boot RESTful APIs with IoT sensor synchronization.
- Designed and implemented a React.js dashboard to display real-time savings balances and full transaction history, enhancing user visibility and financial tracking.
- Engineered bidirectional data sync between physical hardware sensors and digital balances through Spring Boot APIs, ensuring accurate state consistency across devices.

AI-SaaS Content Platform | React.js, Supabase, OpenAI API, Tailwind CSS

Jan 2026

- Built an AI-powered content generation platform using the OpenAI API to produce image and text outputs; integrated with a responsive React.js frontend supporting scalable multi-user access.
- Implemented JWT-based authentication and Supabase Row Level Security (RLS) to enforce per-session data isolation and prevent unauthorized access across user accounts.
- Leveraged Supabase real-time database for low-latency storage and retrieval of AI-generated content, enabling instant feedback and a seamless UX.

COMPETITIVE PROGRAMMING

LeetCode: Solved **370+** problems across arrays, graphs, dynamic programming, and system design topics

Focus Areas: Data Structures, Algorithm Optimization, Problem-Solving under Constraints

CERTIFICATIONS

Generative AI with LLMs – Coursera (2026)

Introduction to Artificial Intelligence – IBM (2026)

Learning Data Analytics Foundation – LinkedIn Learning (2025)

Red Hat Application Development I: Programming in Java EE (AD183) – Red Hat (2026)

Problem Solving – HackerRank (2025)
